PROFESSIONAL SUMMARY

Results-driven AI & Machine Learning specialist, actively building autonomous AI agents and intelligent systems powered by neural networks and deep learning (TensorFlow, PyTorch). Experienced in full-cycle development: training deep models, optimizing performance, and deploying production-ready ML solutions via Flask REST APIs with robust evaluation (F1-score, ROC-AUC, RMSE) and monitoring. Strong foundation in generative techniques and end-to-end AI applications, delivering scalable, impactful outcomes through code, experimentation, and real-world deployment.

SKILLS

AI & Agentic Systems: Agentic AI, Multi-Agent Systems, RAG Pipelines, LLM Integration, Gemini API, NLP, Prompt Engineering, Transformer Models

Machine Learning & Deep Learning: TensorFlow, PyTorch, Hugging Face, Neural Networks, Model Optimization, Feature Engineering, Evaluation Metrics (F1, ROC-AUC, RMSE)

Cloud & Deployment : Microsoft Azure, Azure AI Services, Azure ML, .NET, Azure DevOps, Docker, CI/CD, REST APIs

Programming & Data: Python, C#, Java, JavaScript, TypeScript, SQL, Pandas, NumPy, Data Preprocessing, Large-Scale Data Analysis

TECHNICAL EXPERIENCE

Machine Learning Intern – Cognifyz Technologies

January 2025 – March 2025

- Developed 10+ machine learning models using Random Forest, XGBoost, and ensemble techniques, achieving up to 95% prediction accuracy through feature engineering and hyperparameter tuning.
- Built and deployed Flask-based AI APIs processing 10K+ records/day with sub-200ms inference latency, improving real-time decision-making capabilities and reducing model drift by 30%.

Software Developer Intern – Technical Hub Pvt. Ltd.

June 2024 – August 2024

- Engineered ML-powered classification and retrieval systems that improved search relevance by 40% while reducing feature dimensionality by 60% through optimized feature selection techniques.
- Optimized inference pipelines and monitoring workflows, reducing processing time by 35%, accelerating model iteration cycles by 25%, and improving deployment reliability.

PROJECTS

Smart Shelf AI – Quantum Book Recommendation Engine

- Built a hybrid recommendation system combining collaborative filtering, similarity modeling, and ML techniques across 15+ behavioral features, improving recommendation precision by 32%.
- Developed conversational AI and adaptive feedback mechanisms that reduced RMSE to 0.82 and increased recommendation personalization through continuous user-learning loops.

Placement RAG Agent

- Developed a production-grade RAG system using Gemini API and semantic retrieval across 250+ interview preparation resources, delivering context-aware responses in under 2 seconds.
- Designed AI-powered knowledge retrieval workflows that improved answer relevance by 45% while reducing infrastructure costs by 100% through a serverless deployment architecture.

NeuroPlan AI – A Multi Agent system

- Architected a 6-agent AI ecosystem for planning, evaluation, memory management, and adaptive scheduling, generating personalized study plans with continuous feedback-driven optimization.
- Implemented mastery scoring, retention prediction, and intelligent agent arbitration, improving recommendation relevance by 40% and enabling real-time adaptive learning workflows.

EDUCATION

B.Tech in Computer Science & Engineering (AI/ML) – Aditya University, Surampalem 2022 – 2026 | CGPA: 8.26

Intermediate (MPC) – Siddhartha Junior College, Tuni | GPA: 9.0 | 2022

Secondary Education, CBSE – Sri Prakash Vidya Niketan, Payakaraopeta | GPA: 9.32 | 2020

CERTIFICATIONS & ACHIEVEMENTS

Certifications: IBM (MLwith Python, DL Fundamentals, Data Science 101) | Microsoft Azure AI Fundamentals | Career Essentials in Generative AI by Google | Pearson IT Specialist – Java

Coding Achievements: Gold Badges in C++, Java, Python (HackerRank) | GeeksForGeeks Rank: 40 | Code360: Ninja Dominator
